

Managed Detection &
Response Security Services
#PluginAndProtect

BLUEDOG **SERVICES**

Complete cyber security involves implementing controls based on three pillars. People, processes and technology. Our three-pronged approach helps organisations defend themselves from both organised attacks and common internal threats, such as accidental breaches and human error.

With our full suite of Managed Detection and Response services, bluedog provides you with the solutions to stay protected and secure.

This allows you to focus on your core business, while bluedog handles your security headaches.

BLUEDOG VS TRADITIONAL SOC

The significant difference with bluedog, is that we completely manage the monitoring, detection and response lifecycle, taking control of your cyber security and dramatically reducing the mean time to discover an incident, recover from the incident and lower the risk and total cost of the attack.

Built in at a defensive layer with an offensive angle to detect cybercrime at the earliest possible stage, bluedog can help you minimise 'the window-of-opportunity' for these criminals.

MANAGED DETECTION

bluedog's 24/7/365 managed monitoring provides ongoing network traffic analysis and feedback regarding your business security.

Monitoring is the window into a network's security; in real time, as it changes in the face of new attacks, new threats, software updates, and reconfigurations.

THE BOSS - CLIENT DASHBOARD

- Direct insights in security posture
- Dig into data whenever you want
- Management metrics to use in client meetings

GOVERNANCE RISK & COMPLIANCE

- Report against various industry standards
- See your compliance levels
- Realtime status, no more auditor stress!

1. MONITOR

bluedog provides valuable insight into your company's network showing what is going on, offering visibility into your security management.

- bluedog supports you by making sure employees don't breach company policy, take in viruses or destructive malware.
- Direct insight is given through bluedog's customer dashboard, offering transparent and easy to interpret results.

2. DETECT

The bluedog Security Operations Centre monitors your network 24/7, providing immediate actionable recommendations.

- The qualified team of security analysts watch over your assets, making sure bad actors are not reading along with you.
- Anomalies are constantly analysed, identifying attack types and new ways attackers try to break into your company.
- The moment a problem has been detected, the bluedog incident responders kick in to fight together with you!

3. RESPOND

Incident response or crisis management is what we do! This is what makes the bluedog offering stand out from the rest.

While others warn you that something is wrong in your network, bluedog allows you to sleep and wake up to a resolved incident.

- Incident management in accordance with ISO27035 guidelines, ensuring a proper governed process.
- Full forensic capabilities, incident handling, containment and resolution.

HARD FACTS

85%

**OF BUSINESS ASSETS
ARE IN DIGITAL FORM**

Having your crown jewels available to attackers digitally makes it easier to have them stolen. bluedog protects your assets 24/7 all year long.

90%

**OF HACKS ORIGINATE
FROM PHISHING**

bluedog analysis full network traffic, spotting problems at its root. Seconds after a problem occurs, alerts are raised and incidents are stopped dead in their tracks.

**Want to know how you
can sleep at night again?**

TESTIMONIALS

I enjoy the people-focused nature of bluedog which has continued to remain strong throughout the company's growth and development.

I have always been part of an enterprising team and I feel the leaders of bluedog are supportive and encouraging. It is by far the most comprehensive solution I've seen in the market.

bluedog has helped my business to become compliant with GDPR. Together with their very skilled team, they really saved me many times!

bluedog gave me the opportunity to add value to my customers as a reseller. The dashboard helps me to manage my clients and gives me insights into their security status!

“Cyber security is like painting, except the paint never dries.”
